WHAT WE DO

Transforming Lives, Transforming Communities

Across Africa, children know that education represents the only way out of a life of entrenched poverty. They don't want handouts; they seek opportunity. They want to go beyond primary school to complete a secondary education, learn a trade and even attend University. Beautiful World Canada Foundation knows that we can't help all of them, but if the best and brightest can be helped, then we believe an entire generation can be transformed. Our mission is to help ten million passionate and dedicated students excel in their education; enabling them to create a bright future for themselves, their communities, and their countries.

Partnering to Accomplish Our Goals

Beautiful World Canada has established partnerships with organizations that are outstanding in their endeavours and achievements; vetted and accredited by ourselves and other national and international reputable agencies. Our partners have mastered the art of rising above challenges to create African solutions for African problems. They are community based organizations who assess each child for need and potential and provide them with support that goes beyond money to include counselling, life-skills, medical care, mentorships and limited assistance to their guardians and caregivers.

Our Unique Approach

Many organizations support primary school, but after that, most African children see their dreams wither and die. Culturally, education for boys is prioritized. Girls must help with household chores and care for ill relatives and younger siblings. Their only alternative is to work as servants or enter into an early marriage.

Beautiful World wants to reverse this pattern and restore hope for every child in our programs. We focus on higher education with a priority of education for girls. We know that transformative change takes time. Therefore, Beautiful World's commitment for each child averages six years of support through high school and university or trade school. As students achieve success and gain confidence, they become peer-leaders and serve as role models for younger children and agents of change in their communities.

*"Education is the most powerful weapon you can use
to change the world. Education saves lives."*
